

ASSEMBLY INSTRUCTIONS

ShowTime grips recommends you bring your grip to your local golf shop for assembly. If you choose to assemble it yourself you will need a vise, rubber shaft holder (or thick towel) to hold shaft tightly, mineral spirits, and a blade to remove the old grip. Please proceed with caution when removing the old grip and follow the instructions below.

1. Remove old grip and tape.
2. Peel off liner of self-adhesive label.
3. Place label on butt end of shaft. Align so it is straight and leave 1/2 to 3/4 inch overlap to butt. Gently wrap around shaft.
4. Peel off single liner side of two-sided clear tape. Apply to shaft length wise. Wrap completely around shaft over label then remove two remaining liners.
5. Apply mineral spirits or grip solvent generously inside grip and empty onto grip.
6. Slide on ShowTime grip, wipe down grip, and enjoy.
